EDUCATION

National Institute of Technology, Warangal

November 2022 - Present

B.Tech, Electronics and Communication Engineering

CGPA - 8.92/10.0

Relevant Courses : Problem Solving and Computer Programming in C++, Data Structures, Programming In Python, Introduction to AIML, Data Networks

Minor in Computer Science and Engineering

August 2023 - Present

Relevant Courses :Data Structures, Computer Organization and Architecture, Principles of Database Systems, Operating Systems

Pragati Mahavidyalaya Junior College , Hyderabad Telangana

April 2019 - March 2021

XII - Telangana State Board of Intermediate Education

Percentage - 96.9%

Central Children Academy , Sikar Rajasthan

April 2013 - March 2019

X - RBSE

Percentage - 92.5%

EXPERIENCE

Samsung Research Institute, Bangalore

May 2025 – July 2025

Software Engineering Intern

- Built a Python-based log analysis tool with a user-friendly GUI using Tkinter and CustomTkinter.
- Developed advanced multi-keyword search with case-insensitive and partial-match support.
- Enabled visualization of inter-module message flows using auto-generated sequence diagrams.
- Integrated the tool with existing log parser to enable seamless trace debugging.

TECHNICAL SKILLS

Programming Languages: C++, Javascript, Python

CS Fundamentals: Problem Solving in Computer Programming, Programming in Python , Data Structures and Algorithms, OOPS, DBMS, CN, OS

Web Technologies: HTML, CSS, Javascript

Tools/Platforms: VS Code, Git, Github, Figma, Knime Analytics, Android Studio

COMPETITIVE PROGRAMMING

CodeForces - Pupil (Max. Rating 1287) under the handle **PUNITSHARMA101**

CodeChef - 3-star coder (Max. Rating 1646) under the handle **PUNITSHARMA101**

PROJECTS

Debt Solver 🔗 | HTML | CSS | Javascript

Developed a web application to optimize debt settlements among a group of people, streamlining financial transactions , using **HTML**, **CSS** for styling, and **JavaScript** for dynamic functionality and calculations.

Implemented an algorithm to minimize the number of transactions required to settle all debts.

Created a user-friendly interface for clear visualization of debt relationships.

Spotify Clone 🔗 | HTML | CSS | Javascript

This is a frontend-only Spotify Clone built using HTML, CSS, and JavaScript. It mimics the core UI and functionality of Spotify's web player — from sleek visuals to basic music controls.

Responsive design for desktop and mobile

Seek bar with real-time playback progress

ACHIEVEMENTS

Achieved **AIR 5860** in JEE Mains and **AIR 8450** in JEE Advanced.

Secured **Global Rank 232** out of **19,000+** participants in Starters115 round on CodeChef.

Secured **Global Rank 2275** out of **25,000+** participants in Codeforces Round 934.
